<tr>
<td>Breast</td>
<td>42,250</td>
</tr>
<tr>
<td>Lung</td>
<td>59,280</td>
</tr>
</tbody>
</table>

Every day 162 women die from the disease.

This “hidden” women’s cancer is the least funded cancer in terms of research dollars per death of all the major cancers, and one of the only cancers where patients are routinely blamed as responsible for their condition.

FIVE YEAR SURVIVAL RATE² 2013-2019

- Breast: 90.8%
- Uterine: 81.0%
- Cervical: 67.2%
- Colorectal: 65.8%
- Ovarian: 50.8%
- Lung: 29.6%
- Pancreatic: 12.7%
More research is urgently needed!

Lung cancer receives the least amount of research funding of the major cancers affecting women, despite causing a higher number of annual deaths.

NIH RESEARCH DOLLARS PER DEATH
Of Top Five Cancer Killers (Estimated 2024)

- LUNG: $4,438
- PANCREATIC: $5,932
- COLORECTAL: $7,565
- PROSTATE: $9,135
- BREAST: $19,869

Women who never smoked are more than twice as likely to get lung cancer as men who never smoked.
