**PART-TIME LUNG CANCER SCREENING NAVIGATOR**

GO2 Foundation for Lung Cancer is seeking a motivated, patient-focused, Part-Time Lung Cancer Screening Navigator, with experience in providing clinical care navigation, support, and health-based education to patients and/or caregivers. This person will provide navigation and education to people at risk for lung cancer who are seeking lung cancer screening and call a dedicated support telephone line for 4 hours a day, 5 days a week. This position is in support of a clinical research study and will also be asked to assist with data entry related to calls and provide reports and feedback to the research team.

Our ideal candidate would have a background in providing clinical care navigation, working with supportive organizations/resources and clinical partners to support patients encountering barriers to seeking optimal care, and excellent ability to communicate health and clinical care related concepts to multiple audiences.

This position is a part-time, long-term temporary position working twenty (20) hours a week.

This position may be fully remote.

***Please include a COVER LETTER WITH SALARY REQUIREMENTS, along with your resume.***

Salary range: $24 to $34 per hour

**POSITION SUMMARY**

The Lung Cancer Screening Navigator will provide remote support to people who may be at risk for developing lung cancer in connecting with appropriate lung cancer screening programs through GO2 for Lung Cancer’s (GO2) Centers of Excellence (COE) network, as part of an NIH funded research study. This position will ensure that people who are seeking lung cancer screening are able to find and get in contact with an appropriate Low-Dose CT (LD-CT) based screening program in their community and assist in providing screening education and navigation of barriers that arise to seeking care. This is a half-time position providing support as part of a lung cancer screening-focused clinical research study. The position will also complete data entry, logging of communication details, and attend research team meetings in support of the study.
This position is a part-time, long-term temporary position working twenty (20) hours a week.

**ESSENTIAL FUNCTIONS & RESPONSIBILITIES**
To perform this job successfully, an individual must be able to perform each essential function satisfactorily. Reasonable accommodations may be made to enable individuals with a disability or disabilities to perform the essential functions.

- Provide lung cancer screening navigation to people at risk for lung cancer calling a dedicated support-line 4 hours per day, 5 days per week
- Assess risk and screening qualifications of callers and provide information on local lung cancer screening program and how to seek appointments for LDCT based screening
- Provide basic lung cancer screening education and help callers seeking lung cancer screening navigate barriers to care (lack of referring provider, socio-economic barriers, etc.)
- Develop relationships with hospitals and support organizations in 5 key study states
- Record call details and enter other data as required by clinical research study protocol
- Contribute to research team meetings, providing critical assessment of study protocol and design
- Complete required compliance training, including human subjects research training, as required for involvement in research

Other duties as assigned. This job description is not designed to cover all activities, duties or responsibilities that are required. Duties, responsibilities, and activities may change at any time with or without notice.

**SUPERVISORY RESPONSIBILITIES**
This is not a supervisory position.

**COMPETENCIES**
- Commitment to GO2’s mission & desire to educate, support, and improve outcomes for those living with and at risk for lung cancer
- Excellent ability to communicate health and clinical care related concepts to multiple types of audiences
- Excellent verbal and written communication skills
- Previous experience with clinical care navigation and support, preferably in oncology
- Previous experience providing support, education, and/or navigation in the area of lung cancer risk and screening is a plus
- Previous experience coordinating clinical research is preferred
REQUIRED EDUCATION & EXPERIENCE

- BS, BA, or RN required.
- At least 2 years of experience providing clinical care navigation to patients and/or caregivers, preferably in the area of oncology.
- Understanding of clinical research study methods, the coordination and implementation of research, and/or data analysis and presentation methods for research studies preferred.

WORK ENVIRONMENT & PHYSICAL REQUIREMENTS

This job will be performed in an office environment, GO2 office or remote/home office, primarily sitting at a desk and using a computer and phone. In order to perform the essential functions of the job, the employee must be able to operate a computer and other office equipment. The noise level in the work environment is usually low to moderate. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

TRAVEL REQUIREMENTS

This position will require occasional travel to GO2 office locations, conferences, and events.

EEO STATEMENT
